- General Manufacturing
- Installations
- Partitioning and Maintenance
- Drawings / Designs
- 3D Technical Designs
- Autocad 2D Drawings
- Cnc
- Programming
- Site Survey's
- Floor Layouts

Our Smart Edging Solution

We supply a variety of furniture manufacturers using our innovative edging system. The Edging moulds onto flat board via an automated inline process. We can edge 16mm, 22mm, 28mm and 32mm thick board. It is easily applied to chipboard, MDF, veneer and High-pressure laminate (Formica). During this process a quality plastic based compound is bonded to the board, resulting in a highly durable wear and impact resistant edge. This process uses no glue but fuses with the properties of the board. This makes the edge an integral part of the board as the plastic is inert; there is practically no expansion or contraction. The join line between the edge and the board is so fine that the edge is water resistant and contamination resistant, making it a perfect product for such as Medical, labs and hospitality furniture.

We manufacture to our clients' specifications: rectangular, curved, round or shaped. Our standard colours used for production range from black, graphite, white, brown, cherry maple, oak and silver. Using plastic we can make thousands of colour matches such as blue formica, green formica or red formica.

Personalised edge on all
